

To Whom it May Concern:

I wish to apply for the B.S. Special Major in Dietetics, as I wish to become a registered dietitian. The special major in dietetics meets the curriculum which is required by the American Dietetic Association and has been approved by The Commission on Accreditation of Dietetics Education as a Didactic Program in Dietetics. Completion of this curriculum is required for entry into an ADA approved Supervised Practice Program, which is a necessary step in becoming a registered dietitian.

I would like my degree to reflect the dietetics curriculum I have followed, which exceeds the course requirements of the Family and Consumer Sciences major with a Nutrition and Food Concentration.

Thank you.
